Sincere thanks to our friends and customers, also to those of you who for the first time have requested our catalog this year.

We hope your Iris and Daylilies gave you many days of pleasure the past year. We are looking forward soon to a grand display of flowers, as you no doubt are also. Blooming season becomes more thrilling to us each year with new varieties added as we grow.

As we are hybridizing as well as growing fine Iris and Daylily hybrids, and have been in horticulture for the past forty-five years, both under glass and out of doors, we feel certain we are qualified to know the best; therefor we offer you only one grade—the very finest.

Iris and Daylily hybrids can be grown successfully by anyone. If you have never grown them you are really missing a grand treat.

The newer hybrids are vastly different from the early type flowers. Gorgeous in colors and flower types. Thrilling to all who see them unfold for the first time each continuous year.

We hope you will favor us with an order this season, as we feel sure we have the best, and can please you whether the order is large or small.

Please remember California grown plants are hardy, therefore can be successfully grown even in the coldest sections of this country.

Cultural directions will be sent with all orders.

## SPURIA IRIS

Spurias are a beardless type Iris similar in appearance to the Dutch and Spanish. Sometimes referred to as the "butterfly Iris." They are easy to grow being very hardy. Tall growing, therefore are splendid for background planting. Blooming period begins near the end of the Bearded Iris season and they bloom a long time. They are of the finest for cut flowers in arrangements and excellent for corsages. Splendid for landscaping.

Shipments made in the fall.

**Monnieri—3 ft. 60c, 3 for \$1.45**

A lovely soft yellow. Very smooth wide petaled flower, golden orange on the falls.

**OCHROLEUCA—4½ ft. 55c; 3 for \$1.35**

Beautiful tall white with a yellow spot on the falls. A long keeping cut flower.

## SIBERIAN IRIS

Graceful blooms with beautiful grass-like foliage. Very easy to grow and noted as cut flowers. Wirey flower stalks rise above the foliage producing an abundance of blossoms. This is a beardless type Iris and grows in clumps.

Planting should be done in the fall in ordinary garden soil on the acid side. For this rotted oak leaves are splendid. Should not be allowed to dry out until plants are well established. They are a moisture loving plant, but will grow most anywhere with proper care, in either full sun or partial shade.

Lime and bonemeal are fine for bearded Iris, but not for Siberians or Kaempferi. For these two use fertilizers on the acid side.

For an abundance of flowers leave undisturbed in the garden for several years.

Shipping begins in September.

**SNOW QUEEN—38 ins. 50c; 3 for \$1.10**

A very hardy waxy snow white.

**PEGGY PERRY 50c; 3 for \$1.10**

Dainty ruffled sky blue with a white center.

**CAESAR—42 ins. 50c**

Unusually tall, lovely broad-petalled blue-purple.

**CAESAR'S BROTHER—32 ins. 75c; 3 for \$1.65**

Tall, dashing velvety blue-black purple.

**PSEUDACORUS—(Species) 3 ft. 40c; 3 for 85c**

Yellow flowers have good sized rounded falls. Standards vary from mere points to an inch long. Brown veining at the haft. Very prolific and enjoys plenty of moisture. Not a Siberian, but grows under the same conditions, so we list it here.

## LOUISIANA IRIS

This charming beardless variety comes into bloom near the end of the Bearded Iris season. It is becoming more popular each year as it becomes better known. For cut flowers and adaptability in landscaping they are tops, if given the proper care.

Their natural locality is a marsh. However, give them a rich soil with plenty of humus, on the acid side if possible, also an abundance of water during the growing and blooming season. They are partial to shade during the hottest part of the day, so pick a spot for planting where this can be accomplished.

Their lovely foliage and gorgeous blossoms add lasting beauty to any garden. They grow easily.

Shipped in Late Summer or Early Fall.

**GIGANTICAERULEA—(Species) 60 in. 75c**

Very tall, vigorous, beautiful foliaged plant. Huge flowers, upright petals, recurving sepals of a lovely violet blue.

**FULVA—(Species) Each \$ .50**

Dainty, coppery brick red blossoms, produced in abundance over a long period. Vigorous in plant and flowers.

**DOROTHEA K. WILLIAMSON Hybrid (30 ins.)**

**Each \$ .50; 3 for \$1.20**

Sparkling, large velvety royal purple flowers are excellent for corsages. Produced abundantly over the entire vigorous growing plant. Blooms a long time. A hardy Iris that resembles the orchid.

## EVANSIA OR CRESTED IRIS

**JAPONICA (Species) Each \$ .60**

Sprays of dainty ruffled lavender flowers on 2-foot stems. Blossoms are orchid-like in appearance and appear in the spring. Crests are yellow. Evergreen foliage is luxuriant and a beautiful shade of light green. Suited for mild climates, or in doors in cold climates. Requires planting in shade and moist soil. Slightly acid soil best. Rotted oak leaves are very fine. For corsages and as cut flowers for all purposes they are perfect. Allow plenty of room for spreading. They are fast growers.

## IRIS STYLOSA

**STYLOSA BISCRA Each \$ .50**

Violet-blue three-inch flowers on seven to eight inch stem. Very fragrant. Splendid for constant cutting while blooming. Pretty grass-like foliage should be clipped back late in the fall, so the flowers will not be hidden when spring blooming begins. For cutting purposes flowers are best picked in bud. Full sun or partial shade. Give at least a foot each way in which to spread as they increase rapidly.

## BILLBERGIA

### BILLBERGIA NUTANS (Meaning: nodding)

60c; 3 for \$1.40

An odd flowering plant from Brazil. Very free grower. Blooms in the spring. Suitable for growing outdoors in mild climates. A splendid house plant for cold regions. They want plenty of moisture while in active growth. In summer partial or full shade.

Fascinating pendant or nodding flowers. Blossoms in effect are tricolor. The bracts are a bright rosy pink. Petals a brilliant green edged with a bright metallic medium blue. A real novelty.

## HEMEROCALLIS

### (DAYLILIES)

The Flower With a Future is one of the most fascinating of all time. Its beauty and charm are outstanding. There is so much to be had for so little effort on the part of the gardener. No known disease, no spraying is necessary. The modern hybrids have a wide range of gorgeous colors. The many types of flowers are amazingly beautiful as well as thrilling. They respond to good treatment, increasing flower size and blooming period.

They should be left in clumps undisturbed for several years for profusion of blossoms. For landscape planting, like the Iris, they are ideal. They will grow in full sun or partial shade giving splendid flowers either place.

We offer the finest of sturdy, healthy plants, seedlings or seed.

### Daylily Bargain Offer

No. 4

For those of you who want lovely hybrid Daylilies of different colors, but are not particularly interested in the names, we offer this special bargain. All will be a selection of flowers you will be proud to have. These varieties will vary in heights, with blooming season from early to late. You will be sent colors ranging from pastels to the very brightest. They will be chosen from named varieties, but come to you unlabeled. We feel confident you will be delighted with our choice. Pleasing you means success to us.

Our aim is to acquaint more people each year with Hemerocallis (Daylily) hybrids. This bargain offer is the method by which we do so. We find it making satisfied customers for us, and we thank them for their trust in us.

Daylilies are very fine as cut flowers for arrangements, as well as beautiful in the garden.

If you want something unusually lovely cut individual flowers and arrange in a very low or flat clear glass dish setting it on a completely white background.
